SKILL BUILDERS

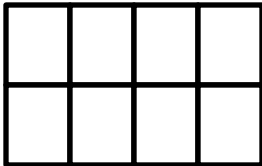

STANDARDS ALIGNED MATH PRACTICE FOR STUDENTS

DAILY MATH PRACTICE

MONDAY	1. Solve the expression if $n = 4$.	2. Color three-fourths of the shape blue.	5. The table below shows the total number of sodas in different numbers of boxes.									
	$n + 10$			<table border="1"> <thead> <tr> <th>Total Sodas</th> <th># of Boxes</th> </tr> </thead> <tbody> <tr> <td>60</td> <td>5</td> </tr> <tr> <td>96</td> <td>8</td> </tr> <tr> <td>132</td> <td>11</td> </tr> <tr> <td>144</td> <td>12</td> </tr> </tbody> </table>	Total Sodas	# of Boxes	60	5	96	8	132	11
Total Sodas	# of Boxes											
60	5											
96	8											
132	11											
144	12											
	3. Draw a line segment.	4. Fill in the missing symbol to make the number sentence true.	How many sodas are in 15 boxes?									
		$11 _ 7 = 18$										

TUESDAY	1. Solve the expression if $n = 4$.	2. Color one-third of the shape red.	5. The table below shows the total number of eggs in different numbers of cartons.									
	$n \times 6$			<table border="1"> <thead> <tr> <th>Total Eggs</th> <th># of Cartons</th> </tr> </thead> <tbody> <tr> <td>72</td> <td>3</td> </tr> <tr> <td>96</td> <td>4</td> </tr> <tr> <td>168</td> <td>7</td> </tr> <tr> <td>216</td> <td>9</td> </tr> </tbody> </table>	Total Eggs	# of Cartons	72	3	96	4	168	7
Total Eggs	# of Cartons											
72	3											
96	4											
168	7											
216	9											
	3. Draw two perpendicular lines.	4. Fill in the missing symbol to make the number sentence true.	How many eggs are in 18 cartons?									
		$25 _ 24 = 600$										

WEDNESDAY	1. Solve the expression if $n = 4$.	2. Color half the shape purple.	5. The table below shows the total number of stickers in different numbers of packages.									
	$16 \div n$			<table border="1"> <thead> <tr> <th>Total Stickers</th> <th># of Packages</th> </tr> </thead> <tbody> <tr> <td>110</td> <td>5</td> </tr> <tr> <td>154</td> <td>7</td> </tr> <tr> <td>176</td> <td>8</td> </tr> <tr> <td>242</td> <td>11</td> </tr> </tbody> </table>	Total Stickers	# of Packages	110	5	154	7	176	8
Total Stickers	# of Packages											
110	5											
154	7											
176	8											
242	11											
	3. Draw a ray.	4. Fill in the missing symbol to make the number sentence true.	How many stickers in 19 packages?									
		$19 _ 15 = 34$										

THURSDAY

1. Solve the expression if $n = 4$.

$$14 \times n$$

2. Color one-fourth of the shape green.

5. The table below shows the total number of candies in different numbers of boxes.

Total Candies	# of Boxes
63	3
105	5
147	7
168	8

How many candies are in 10 boxes?

3. Draw a pair of parallel lines.

4. Fill in the missing symbol to make the number sentence true.

$$0 _ 25 = 0$$

FRIDAY

1. Solve the expression if $n = 4$.

$$30 - n$$

2. Color two-thirds of the shape orange.

5. The table below shows the total number of cookies in different numbers of batches.

Total Cookies	# of Batches
48	2
72	3
120	5
192	8

How many cookies are in 9 batches?

3. Draw a right angle.

4. Fill in the missing symbol to make the number sentence true.

$$12 _ 12 = 144$$

REFLECT & GROW

CORRECTION #1

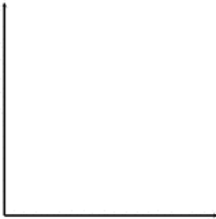

REFLECT: Why is understanding vocabulary a big part of being successful in math?

CORRECTION #2

TEACHER NOTES:

GRADE:

DAILY MATH PRACTICE

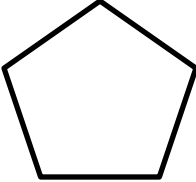

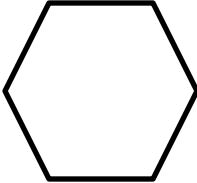

MONDAY	1. Write the algebraic expression. 5 more than n	2. Prime or composite? If composite, list the factors. 21	5. Tracy is building a path to her shed. She has 982 bricks. There will be 27 bricks in each row of the path. How many complete rows can she create?
	3. Acute, right or obtuse? 	4. What combination of three coins can be used to make 27 cents?	
TUESDAY	1. Write the algebraic expression. 12 less than a	2. Prime or composite? If composite, list the factors. 36	5. Andrew is designing a mosaic for the school hallway. He has 1,295 blue tiles. He needs 84 blue tiles for every square foot of wall. If the wall is 16 square feet, does he have enough blue tiles to complete his design? Show your proof.
	3. Acute, right or obtuse? 	4. What combination of five coins can be used to make 25 cents?	
WEDNESDAY	1. Write the algebraic expression. 5 times m	2. Prime or composite? If composite, list the factors. 62	5. Shana is making bracelets for her friends. She has 984 beads she can use. Each bracelet uses 132 beads. How many complete bracelets can she create?
	3. Acute, right or obtuse? 	4. What combination of three coins can be used to make 15 cents?	

THURSDAY	<p>1. Write the algebraic expression.</p> <p>y less than 19</p>	<p>2. Prime or composite? If composite, list the factors.</p> <p>87</p>	<p>5. Mom was making club sandwiches for my friends and me to take camping. She has 5 loaves of bread with 22 slices in each. If each sandwich uses 3 slices, how many complete sandwiches can mom make?</p>
	<p>3. Acute, right or obtuse?</p> 	<p>4. What combination of six coins can be used to make 10 cents?</p>	

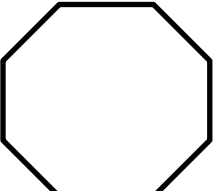

FRIDAY	<p>1. Write the algebraic expression.</p> <p>n divided by 4</p>	<p>2. Prime or composite? If composite, list the factors.</p> <p>54</p>	<p>5. Mr. Johnson is building a retaining wall in his backyard. He has 719 bricks. He uses 17 bricks in each layer of the wall. How many layers tall can he build with only the bricks he has?</p>
	<p>3. Acute, right or obtuse?</p> 	<p>4. What combination of two coins can be used to make 20 cents?</p>

DAILY MATH PRACTICE

MONDAY	1. Translate the expression in words. $10 + w$	2. If vowels are worth 5 and consonants are 3, what is the value of this word? spelling	5. There are four times as many problems on the math homework as on the 8 question science homework. There are twice as many questions on the science homework than on the reading. How many questions are on each assignment?
	3. Name the shape based on its attributes. 	4. How much less than a dollar? 16 pennies & 2 dimes	
TUESDAY	1. Translate the expression in words. $4x$	2. If vowels are worth 5 and consonants are 3, what is the value of this word? mathematics	5. There are three times as many cats in the animal shelter as puppies. There are twelve times as many fish as there are puppies. If there are 12 cats, how many fish and puppies are at the shelter?
	3. Name the shape based on its attributes. 	4. How much less than a dollar? 2 half dollars	
WEDNESDAY	1. Translate the expression in words. $20 - s$	2. If vowels are worth 5 and consonants are 3, what is the value of this word? explorer	5. There are four times as many pennies in a piggy bank as quarters. There are twice as many dimes as pennies. If the value of the dimes is \$4.00, what is the value of all the coins in the bank?
	3. Name the shape based on its attributes. 	4. How much less than a dollar? 3 quarters & 2 dimes	

THURSDAY	<p>1. Translate the expression in words.</p> <p style="text-align: center;">8b</p>	<p>2. If vowels are worth 5 and consonants are 3, what is the value of this word?</p> <p style="text-align: center;">entertain</p>	<p>5. A pack of candy has red, yellow, and orange. There are 12 red candies in a package. There are half as many yellows as oranges. The number of orange candies is three time the number of reds. How many total candies are in the package?</p>
	<p>3. Name the shape based on its attributes.</p> 	<p>4. How much less than a dollar?</p> <p>12 pennies & 3 nickels</p>	

FRIDAY	<p>1. Translate the expression in words.</p> <p style="text-align: center;">$14 + x$</p>	<p>2. If vowels are worth 5 and consonants are 3, what is the value of this word?</p> <p style="text-align: center;">threw</p>	<p>5. Kyle spent twice as long on his reading assignment as on his math. He spent 15 minutes on writing homework. The writing took half as long as the math did. How much time did Kyle spend on homework today?</p>
	<p>3. Name the shape based on its attributes.</p> 	<p>4. How much less than a dollar?</p> <p>4 nickels & 2 dimes</p>

DAILY MATH PRACTICE

MONDAY

1. Complete the table.

x	$x + 5$
5	
20	25
72	

2. List the factors.

 36

5. A candy dish has 50 candies and three-tenths of them are mints. How many are not mints?

3. What is the perimeter of a regular octagon with sides of 14 m?

4. Write the improper fraction as a mixed number.

 $\frac{15}{7}$
TUESDAY

1. Complete the table.

p	$24 - p$
4	20
8	
15	

2. List the factors.

 90

 5. A fish tank contains 30 fish and $\frac{4}{6}$ of them were goldfish. How many goldfish are in the tank?

3. What is the perimeter of a square with 25 inch sides?

4. Write the improper fraction as a mixed number.

 $\frac{25}{2}$
WEDNESDAY

1. Complete the table.

k	$3k$
12	
15	45
25	

2. List the factors.

 84

5. An apple tree had 20 apples. Two-fifths of them were ripe. How many were not ripe?

3. What is the perimeter of a regular hexagon with sides of 20 cm?

4. Write the improper fraction as a mixed number.

 $\frac{16}{5}$

THURSDAY

1. Complete the table.

n	$36 \div n$
2	
6	
9	4

2. List the factors.

24

5. A zoo has 35 exhibits and $\frac{4}{7}$ of them are mammals. How many mammal exhibits does the zoo have?

3. What is the perimeter of a regular decagon with sides of 14 inches?

4. Write the improper fraction as a mixed number.

$\frac{35}{8}$

FRIDAY

1. Complete the table.

a	$a - 10$
40	30
52	
98	

2. List the factors.

12

5. A bouquet of flowers contains 46 flowers and half of them are roses. How many of the flowers are not roses?

3. What is the perimeter of a rhombus with sides of 14 miles?

4. Write the improper fraction as a mixed number.

$\frac{17}{6}$

REFLECT & GROW

CORRECTION #1

REFLECT: Did you put your full effort in this week? Explain why or why not.

CORRECTION #2

TEACHER NOTES:

GRADE:

DAILY MATH PRACTICE

MONDAY

1. Write an equation to represent the pattern.

n	m
2	4
3	6
4	8

2. There is a bucket of goggles at the pool. Four are red, 6 are black, 2 are yellow, and five are blue. What fractional part of the goggles are a primary color?

5. Kim has 5 dogs at her house. She wants to make socks to keep her dogs' feet warm in winter. If it takes her 15 minutes to make each sock, how long will it take her to finish enough for all her dogs?

3. The angles on a triangle must total 180° . Find the measurement of the missing angle.

4. Convert the units.

$$10 \text{ ft } 3 \text{ in.} = \underline{\hspace{2cm}} \text{ in.}$$

TUESDAY

1. Write an equation to represent the pattern.

a	c
4	15
11	22
19	30

2. There are seven fantasy books, 3 mystery books, and 9 informational books on the table. What fractional part of the books are nonfiction?

5. Tony has four folders in her desk. Each folder has 4 pages of work for him to finish. If there are 14 problems on each assignment he has to complete, how many problems does Tony need to finish?

3. The angles on a triangle must total 180° . Find the measurement of the missing angle.

4. Convert the units.

$$15 \text{ yd} = \underline{\hspace{2cm}} \text{ feet}$$

WEDNESDAY

1. Write an equation to represent the pattern.

h	b
5	19
10	24
20	34

2. A candy dish has 9 mints, 8 Hershey kisses, 6 lollipops, and four butterscotch drops. What fractional part of the candies are not chocolate?

5. Brian visited the zoo with his class. There were 3 groups of children. Each group had 7 children. If a child's ticket costs \$2.50 and chaperones were free, how much did the group pay to enter the zoo?

3. The angles on a triangle must total 180° . Find the measurement of the missing angle.

$$90^\circ, 60^\circ, \underline{\hspace{2cm}}$$

4. Convert the units.

$$60 \text{ feet} = \underline{\hspace{2cm}} \text{ in.}$$

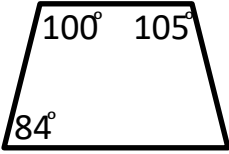

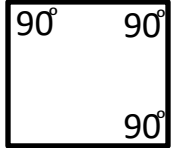

THURSDAY	<p>1. Write an equation to represent the pattern.</p> <table border="1"> <tr> <th>j</th> <th>n</th> </tr> <tr> <td>12</td> <td>6</td> </tr> <tr> <td>36</td> <td>18</td> </tr> <tr> <td>50</td> <td>25</td> </tr> </table>	j	n	12	6	36	18	50	25	<p>2. There are 6 science fiction books, 5 fantasies, and 3 informational texts on the table. What fractional part of the books are fiction?</p>	<p>5. Will's swim team is going to a meet in the next town. There are six vans for the team. Each van carries 6 swimmers. If each swimmer brings three swim caps to the meet, how many swim caps does the team have in all?</p>
	j	n									
12	6										
36	18										
50	25										
<p>3. The angles on a triangle must total 180°. Find the measurement of the missing angle.</p> <p>$80^\circ, 20^\circ, \underline{\hspace{2cm}}$</p>	<p>4. Convert the units.</p> <p>12 yards = $\underline{\hspace{1cm}}$ in.</p>										

FRIDAY	<p>1. Write an equation to represent the pattern.</p> <table border="1"> <tr> <th>b</th> <th>x</th> </tr> <tr> <td>3</td> <td>12</td> </tr> <tr> <td>4</td> <td>16</td> </tr> <tr> <td>10</td> <td>40</td> </tr> </table>	b	x	3	12	4	16	10	40	<p>2. Brian has seen 5 snakes, 3 iguanas, 8 pandas, and 2 spiders at the zoo. What fractional part of the animals are mammals?</p>	<p>5. Tracy has 2 boxes of crayons in her art kit. Each box has 24 crayons. If four of the crayons in each box are shades of blue, how many total blue crayons does Tracy have?</p>
	b	x									
3	12										
4	16										
10	40										
<p>3. The angles on a triangle must total 180°. Find the measurement of the missing angle.</p> <p>$45^\circ, 60^\circ, \underline{\hspace{2cm}}$</p>	<p>4. Convert the units.</p> <p>60 feet = $\underline{\hspace{1cm}}$ yards</p>

DAILY MATH PRACTICE

MONDAY

1. Write an equation for the rule.

c	d
5	45
9	81
11	99

2. What's the missing number?

$$\frac{1}{3} = \frac{?}{9}$$

5. Sylvia takes gymnastics lessons. She pays \$648 for the full year. Each month costs the same amount. How much is one month of lessons?

3. Name the shape based on its attributes.

4. A book is \$2.85. If this is my change, how much did I give the cashier?

TUESDAY

1. Write an equation for the rule.

x	y
48	6
32	4
16	2

2. What's the missing number?

$$\frac{2}{4} = \frac{8}{?}$$

5. Sally pays for a subscription to a magazine she receives twice per month. Six months costs her \$48. How much does she pay per magazine?

3. Name the shape based on its attributes.

4. A can of soda is 75 cents. If this is my change, how much did I give the cashier?

WEDNESDAY

1. Write an equation for the rule.

w	z
36	12
21	7
12	4

2. What's the missing number?

$$\frac{?}{54} = \frac{2}{9}$$

5. Betty is taking violin lessons. Three months of lessons cost \$255. She pays the same amount for lessons each month. About how much does Betty pay per month?

3. Name the shape based on its attributes.

4. A notebook is \$2.65. If this is my change, how much did I give the cashier?

THURSDAY

1. Write an equation for the rule.

n	m
5	30
9	54
12	72

2. What's the missing number?

$$\frac{12}{30} = \frac{?}{90}$$

5. Tricia's two children attend daycare each weekday. She pays \$550 per month for each child. How much does Tricia pay for daycare in one year?

3. Name the shape based on its attributes.

4. A candy bar is 89 cents. If this is my change, how much did I give the cashier?

FRIDAY

1. Write an equation for the rule.

a	b
12	25
30	43
57	70

2. What's the missing number?

$$\frac{12}{24} = \frac{?}{50}$$

5. Kyla is in a swim club. The membership fees are \$984 per year. If Kyla is going to pay her fees in equal monthly installments, about how much should she pay each month?

3. Name the shape based on its attributes.

4. My lunch was \$5.65. If this is my change, how much did I give the cashier?
